

Welcome to the Brute Force Linking Loophole software membership.

Honestly its great to have you here!

This is a joint effort by myself Peter Drew and Angela V. Edwards.

Unaware to me, back on the 14th November 2008, Angela released this fantastic monthly report listing very high PageRank sites where you can place links to your money sites with the anchor text of your choice.

A couple of months ago, my email and skype started to go wild with Internet Marketers and SEO Pro's alike sending me incredible feedback on the success of this method.

Being the King of SEO and Internet Marketing automation, if I don't mind saying so myself LOL , I immediately saw.

1. How laborious this process would be, to sit there all day, day after day creating these links.
2. How simple it would be for my team here to automate this process.

Always wanting to partner up with other successful marketers, it was a no brainer to contact Angela directly and put out this amazing software together. I create the software based on the best sites to date while Angela does what she does best and find these incredible sites for everyone to benefit from.

Synergy at its best. Two partners focusing on what they are best at, providing and incredibly valuable product between them.

Currently this software has 40 of these sites in it. We will be updating this software each month with the best of the sites that Angela finds each month.

As a software developer I cannot add all the sites in Angela's report each month, as some sites do not lend themselves easily to access via software. So make sure you get Angela's monthly report aswell. From [here](#).

Angela is incredibly proud of her membership! Why? The first thing she said to me during our first phone call was she is so happy that she can release this product and help so many people online. She is helping literally 1000's of people right now, and now in combination with us, we plan to double this amount, by providing an Automated solution to incredibly speed up this process and offer a forum where people can discuss best methods of using this software.

To further help people get the rankings and associated I am going all out, by offering another software for gaining strong links from authority sites automatically. ***My Brute Force Social Bookmarking Submitting Software***. This is an automated solution to submitting your money site URL's instantly to the Top 20 Social Bookmarking websites, to even further increase backlinks from more authority websites in Google!. You will be emailed this software once your trial completes. You only need to install it and start it. All the Social bookmarking sites you need to register are listed on this page <http://www.peterdrew.net/socialsiteregistrations/> This page lists the social bookmarking sites on the left and opens their registration pages on the right frame for very easy registration. You only need to do this once.

Now you have taken your trial of the software, this instantly gives you access to my <http://seofightclub.bruteforceseo.com> Forum. Your Username and Password was emailed to you via aweber, please check for this access email, including your junk folders.

If you need any help whatsoever go to my support system
<http://support.bruteforceseo.com>

On to the Software itself.

Download the software here

<http://www.BruteforceLinkingLoophole.com/linkingloophole.zip>

In this zip file

Brute Force Linking Loophole.zip file (You are reading it now)
linkingloophole.msi = installation file.

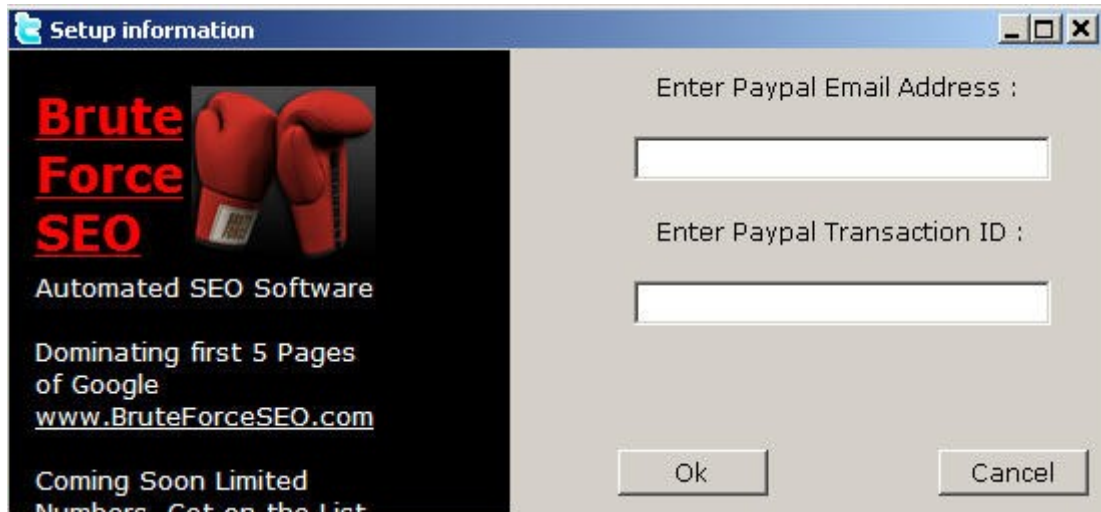

To run this software successfully on your computer, you need these two files below installed on your computer.

1. The most recent version of .NET get it here.
www.microsoft.com/downloads/details.aspx?FamilyId=333325FD-AE52-4E35-B531-508D977D32A6
2. You need the latest version of Internet Explorer installed on your computer. This software uses the IE Modules to communicate with the many High PR sites in the software.
<http://www.microsoft.com/windows/internet-explorer/default.aspx> (this is recommended though not 100% required. But best to have the most recent IE on your computer anyway.)

Please install these two above files now.

Then install the software.

Once you have installed the software and start it, you will be presented with this log in screen.

This is where you enter your

1. Paypal Email address .
2. The transaction ID for the \$1 payment. This was supplied to you on the webpage after completing the \$1 trial payment. Or you can log into your Paypal Account, go to the \$1 payment for the trial. Then copy the Transaction ID associated with this \$1 payment. (NOT the subscription ID)

Note: Only one paypal email address, per trial period. Meaning, you can only take the trial once. If you cancelled and would like to join this membership at a later date, you will need to contact support www.support.bruteforceseo.com and see if any slots are still open.

Now your software will display this splash screen

and will authenticate itself by connecting to my server then open.

(On the rare occasion the software gets stuck on this screen and will not pass it, this means your computer has software installed that is blocking the software from reaching the internet, such as a firewall or anti viral software, to which you will need to give permission to this software to access the net)

Please read this entire document, including the [Major Update 21st August 2009](#)

Quick start operation.

You create a **new email account and new Accounts** each time you do a linking promotion with this software.

Its very simple

enter your niche in the **Main Keyword Field**

enter your password in the **Password Field** (*8 characters minimum*)

enter default username, user a variation of the niche you are targeting, up to 15 characters.

Enter URL of the site you are promoting. e.g <http://www.domain.com>

Then click on the Create Email button. This creates a new Yahoo email account that all your accounts are created in.

Then go to File/Export to save this configuration. Typically you will save this to the directory this program resides in.

Then open a browser window and open <http://mail.yahoo.com> enter the yahoo email address you created and password to log in.

Then press on the Step 1 button to start creating accounts.

Open a text file, to record some details as accounts are created.

Each time a new account is created via the software, check the email and open the confirmation link sent to your email address. Some require you click on a link inside the email to confirm this email address. Some accounts supply a password to use, record the site name and the password to your text file. Continue till all accounts have been created.

Some accounts allow you to update your password in the confirmation link. Update this to your usual password. Record this site and password to your text file.

Once all are created, go to the sites that do not have a password listed beside them, double click on this site, a new window will pop up where you can then enter the password supplied which is recorded in your text file.. Repeat till all are completed. (pkarchive.org does not require a username and password, so leave these fields blank)

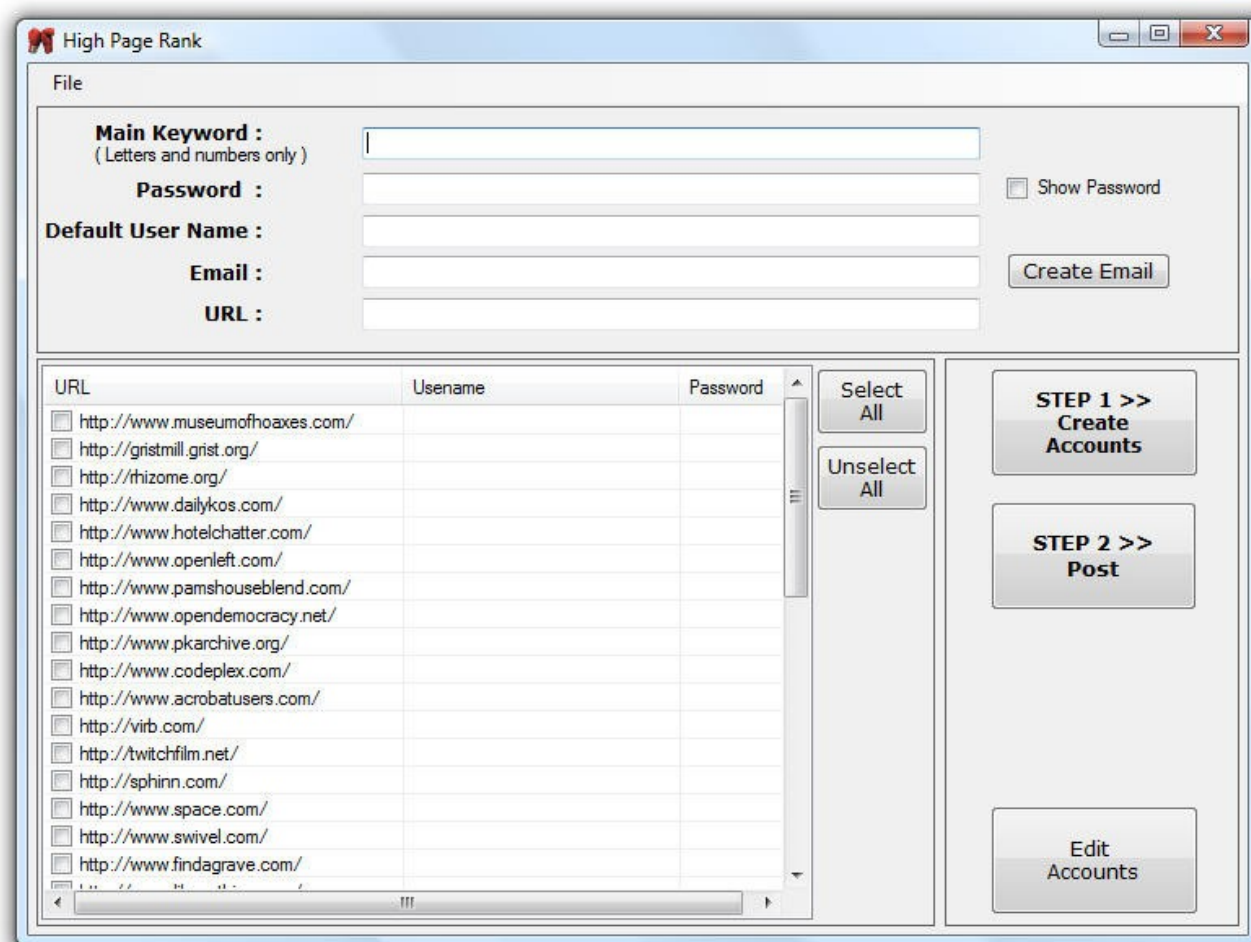

Then click on the Step 2 button, a new window will pop up and place your links using your main keyword as anchor text on all these high pagerank sites automatically. No input from you is required at this time. (*Though if your like me, you'll have the window open, watching automation in progress :-)*)

Typically I shrink down this window and do my other work, or start the software again and create more accounts under a different niche.

Note: there is a skip button on the preview window, in case on of the sites is down. You can click on this skip button to proceed to the next site.

Software Operation.

This is the simplest software I've released, its very simple to use.

This is the software below. As you can see there are only 2 Steps.

Before you can start the 2 steps, simply enter the information of the site you want to rank very highly in the fields provided

Main Keyword: The main keyword or keyword phrase you are targeting.

Password: 8 characters of letters and numbers

Default User Name: all one word, no spaces up to 15 characters

Email: Enter a email address. Or click on the Create Email button to create a Yahoo email account account at mail.yahoo.com.

URL: The web address of the websites you are promoting. e.g. <http://www.mysite.com>

I added the ability to create email accounts easily for our members who will use this software for their SEO clients. You can now easily create one email account for each project run and then hand this email account to your SEO Client. If you do not have any SEO Clients, now is a good time to start.

Now you have entered the above information,

Open a new window in Internet Explorer and log into www.Gmail.com Log in with the gmail account created above.
Click on the Select All button, this selects all the sites in the software.

Then click on the

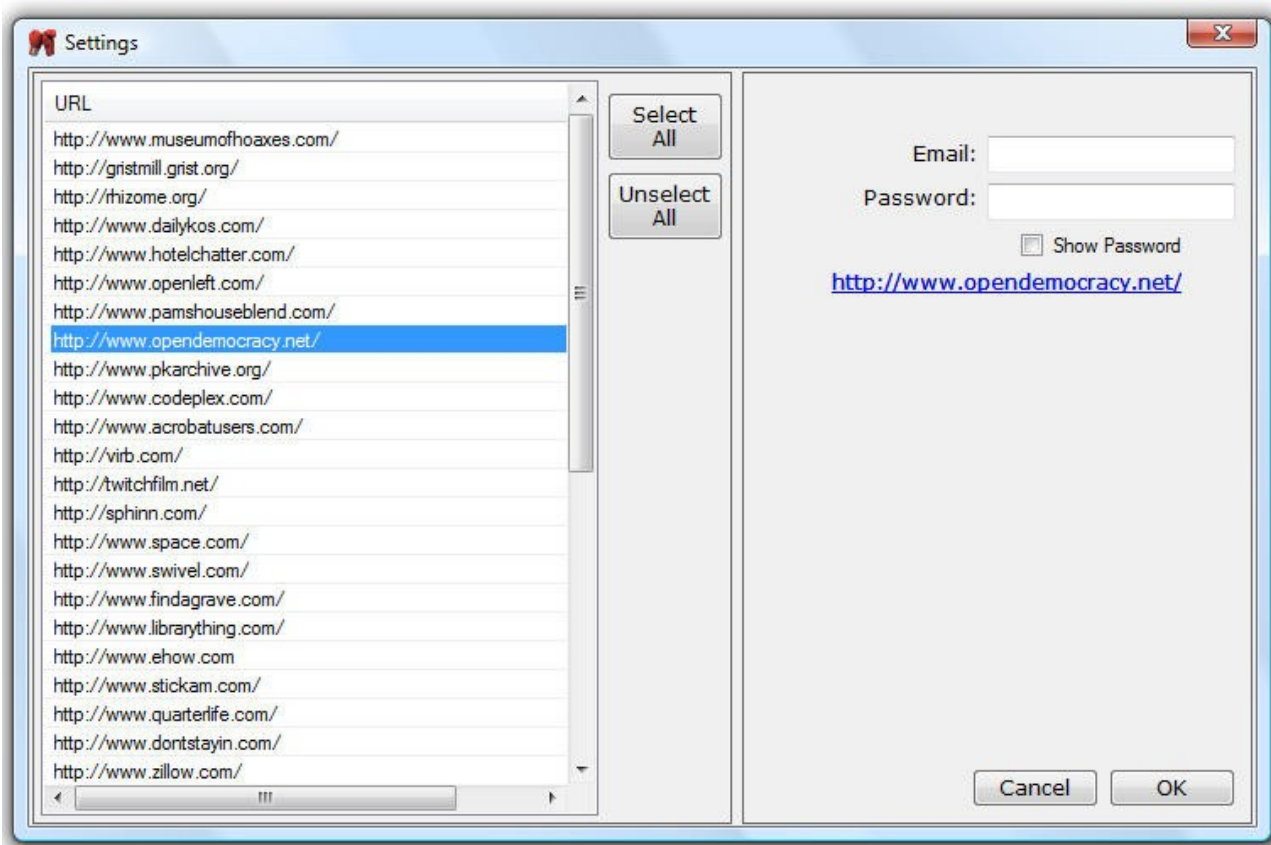

The software will now go to each of these sites listed down the left and create a user account on each of them. Some of these sites require a capture entry, a small window in the software will pop up with the capture image in it and a field underneath it to enter the capture letters.

The majority of these sites require you to click on a link in an email sent from this site to your email address. In your internet explorer window where you have your yahoo email account opened, as the software creates new accounts, open each email and open the confirmation links in a new tab in internet explorer, by right clicking on the link and going to "open in new tab".

Some sites offer an account registration with a temporary password. Record the name of this site and the temporary password to a text file. Repeat this as necessary.

Once you have created all the accounts. You will see the account name and password stored beside the High PR websites.

Some of these will have the password missing. Double click on this site, this will open a new window like this, where you can then enter the password, saved in your text file.

Then click on the OK button to save it to the list.

This process takes about 30 mins, depending on the amount of sites we have listed in the software at the time you order it. Compared to 4 hours typically doing it by hand.

Now that's all the hard work done! :-)

Once you have entered the passwords, now click on the

When clicking on this button, a new preview window will open. You do not need to do anything at this point. The software logs into each of the sites listed and places links on these sites using your URL and your Main keyword as Anchor Text.

Once completed. The software will then pop a window with all your URL's listed. Copy and paste these to your text file for future reference.

Some SEO Tips for using this software to get the best results.

For the absolute best method of getting rankings. The TITLE of your site should have the keyword phrase in it, that you are targeting. This sounds a bit limiting, but with some creative thought, you

can do very well out of your titles, targeting different terms.

Update 30th July 2009

Added Auto Capture Solving Feature.

This addition to this already amazing software now automatically enters the capture letters and numbers for you. These are 95% accurate. Its a beauty to watch, captures pop up, wait a few seconds and you will see the capture solved and entered to the account page like magic! There is still the option to enter them manually.

This makes Step 1 a no brainer, get the software started and shrink it down and continue on with your work till its completed creating accounts. Then go to your Yahoo email account and click on the confirmation links. Then click on step 2. (note some emails present new passwords, which need to be manually these sites, do this by clicking on the corresponding site, a page will pop up where you can enter the new password supplied.)

FAQ.

One email address and set of accounts per linking project.

How often can I use this software on my domain? I use it once every 5 days per domain.

Can you manually add sites to this software? Not possible.

Can I use this to promote my individual pages on my website? Yes, very much so. Doing this helps these pages rank very well and also adds authority to your overall website.

www.domain.com = yes

www.domain.com/niche-here/ = yes

www.domain.com/nichehere.html = yes.

www.domain.com/niche-here/other-niche.html = yes.

I would do one of these every 5 days, from my testing this is perfect.

We will be adding new sites each month to this software. Removing those no longer suitable. Each month the volume of sites in this software will increase.

Can I use this to do SEO work for offline companies? Yes very much so, a lot of customers do exactly this with great success.

Can I run this software on more than one computer simultaneously ? No. you will require one licence for each computer and purchased by an individual Paypal email account for each computer.

Does this software work on a Mac? This software is designed to run on PC. Though I have some customers who use it on Mac's successfully in parallel in XP. Though we do not support this, since we do not have any mac's here in this office.

Some real life examples.

Example 1.

My site www.BruteForceSEO.com

Title = Brute Force SEO Software by Peter Drew

Here I'm targeting 3 different terms.

1. Brute Force SEO
2. Seo Software
3. Peter Drew

While testing this Brute Force Linking Loophole software. I thought I'd go for the term seo software

A massively competitive term in google with over 30 million competing pages in Google, and very powerful domains at the top of the result listings. I searched for my site and found it ranked No 668.

So then I edited my title tags on the main page and added the word software , after seo. Previously the title was Brute Force SEO by Peter Drew, so I slipped the word software in after the word SEO.

Original Title = Brute Force SEO By Peter Drew

Updated Title = Brute Force SEO Software by Peter Drew

I then ran the Brute Force Linking Loophole software using these details;
main keyword = seo software.

Note: at this stage there was only 20 sites in the software. (testing the software features as we

developed it)

After a couple of days of checking, in google I noticed that my title was not updated, in google. So I went to my other site www.html2rss.com (totally free site) and created an RSS feed for this front page.

<http://www.html2rss.com/site/9-Brute-Force-SEO.xml> (view it in Firefox browser) and promoted that feed to the top 40 RSS aggregators using my www.badassrss.com software. This helped get the existing indexed site more spider attention to get the title tags updated faster.

The next day the search engine spiders visited my site and updated the title tag on my listing in google.

Did I say I love my Job? :-) once the title was updated I found my site listed on the first page of google coming in @ No 6!

Having been doing this for a long time, this first entry in the serps after changing the title and adding quality backlinks, I know this initial listing will not stick straight away, but does give an excellent indication of where it will end up eventually.

Typically in linking promotions like this, you get an initial high listing, then google will do a bit of a Google Dance, with your ranking dropping a page or two, while it figures out where to list you. Catching that first jump in the rankings gives a very clear indication where it will end up eventually using these backlink strategies. To get it back to this high listing, I will repeat the same seo linking promotion using new accounts in this software once a week for the next two weeks.

If I find this to be a very profitable niche I will repeat it again in a month or two to consolidate its listing. From this example of entering the ranking at No 3, I think after 2 more linking campaigns and after google stops dancing around I will eventually sit in position 3 4 or 5. You can search in google now for seo software and see where my bruteforceseo.com site is ranked right now. At time of writing this it is in position No 14.

Example 2.

I thought I'd target some more massively competitive terms using my Automated Twitter Software site www.BruteForceSocialMedia.com site.

Originally the title was
Brute Force Twitter by Peter Drew and Dana Whillhoit.

(I was originally targetting the term
brute force twitter
which I own No1.

Another marketer thought it was cool to use my brute Force brand LOL god love him!)

I decided to go for a few more terms :)

Twitter Marketing Software
and
twitter marketing
and
marketing software

so I ended up with this title = Brute Force Twitter Marketing Software.

Then ran the Linking Loophole Software using these terms, being
twitter marketing
marketing software
twitter marketing software.

I really like this strategy of targeting three different terms and having them all in the one title. Why? Each run of this linking loophole software, as well as promoting for a specific term, each run helps build authority for this website. So each run helps the previous runs by adding that bit more of authority to the domain itself. Thus helping all terms to rank well.

This is especially true for directory websites. That have many directories off the main URL each targeting a specific niche on their main domain.

e.g

rings.com

rings.com/diamond-rings/

rings.com/ruby-rings/

rings.com/wedding-rings/

rings.com/engagement-rings/

(there are some excellent threads on the SEO Fight Club forum about sites such as these, do a search for charms to find this thread.)

So I ran the linking loophole software 3 times using the 3 different niches, initial results are

twitter marketing

No 7 out of Results **1 - 10** of about **163,000,000** for [twitter marketing](#). (0.27 seconds)

twitter marketing software

No 2 out of Results **1 - 10** of about **32,400,000** for [twitter marketing software](#). (0.30 seconds)

Marketing software

(was not found in the top 1000 originally)

No 88 out of Results **81 - 90** of about **133,000,000** for [marketing software](#). (0.20 seconds)

(this is after only one run of the software and will improve over time, most likely by the time you have read this doc, check them all in google now if you like

So with some creative adjustments to my title tags on the above site in combination with the linking loophole software my exposure in google has increased dramatically providing me more sales and more income. Noting this was achieved on a site that is only 4 months old.

Placing the main keyword phrase you are targeting at the beginning or front of your title helps rankings aswell.

Update on these Linking loophole tests.

| term | site | search volume | competiton | Placement | Other notes |
|----------------------------|-----------------------|---------------|-------------|-----------|--------------------------------------|
| seo tips | petes facebook page | 33,100 | 20,500,000 | 6 | |
| twitter marketing | bruteforcesocialmedia | 8,100 | 164,000,000 | 4 | rising |
| paypal affiliate program | bruteforceseo | 1,300 | 17,300,000 | 6 | |
| paypal affiliate | bruteforceseo | 5,400 | 15,500,000 | 2 | |
| seo software | bruteforceseo | 49,500 | 19,900,000 | 15 | between 5 and 15, was 660 |
| twitter marketing software | bruteforcesocialmedia | ? lots | 35,100,000 | 2 | |
| marketing software | bruteforcesocialmedia | 201,000 | 139,000,000 | 72 | only 2 days old. was not in top 1000 |
| twitter software | bruteforcesocialmedia | 4,400 | 200,000,000 | 6 | |
| power twitter | bruteforcesocialmedia | 6,600 | 205,000,000 | 18 | 3 days old was 700 |

Example 3.

This is for power SEO link Users.

As you now know, I am providing the Brute Force Social Bookmarking Submission software.

This software works with the top 20 Social Bookmarking Websites. Each of these websites, provide you with your individual account URL e.g somesite.com/user/peterdrew/ or similar.

I am going to provide you with a way to have 20 of your OWN Authority Websites that you OWN forever. How cool is that?

Consider this – Using the Brute Force Linking Loophole software, and using one of your Social Bookmarking website account URLs as the link to promote. ???

Confused? Ok take this site for example

<http://www.propeller.com/member/peteinoz/>

this is my account url on propeller.com

I can submit this URL via the Brute Force Linking Loophole software, and have a LOT of links from HIGH Page Rank sites pointing to it.

What this achieves is giving this specific account URL more Authority in Google and thus any links that are promoted inside it will get a LOT more linking love as far as google is concerned.

This provides your money site with incredibly powerful 2 3 and 4 way links. And any future sites you promote via these social bookmarking sites will get the benefit of this additional linking love :-)

And guess what? These links just grow with link power over time and you OWN them forever!

Very simple strategy that is incredibly effective. Please keep it to yourself.

Do this method over time. No need to do all 20 in one go, do it over a couple of weeks or months, the linking loophole software in itself is incredibly powerful, this method described above is just icing on the cake :-)

Example 4.

SEO Clients.

If you are in consultation with a company with the view to providing their SEO services, this is what I do since I have the advantage of automation on my side. Giving me the freedom to get results in google with very little effort. I will do some quick research for their main term in google and the free google keyword research tool to find a nice long tailed phrase that they are not currently ranking for.

I will note this term and tell the prospective company, No1. That they should be ranking for this term. And show them that they are not currently in the top 1000 for this term, or show them the listing they have for this term, typically its in the 100's if there at all.

I will then run this software over this term for their site, and in a week get back to them showing how I now have their site ranking in X or XX position for this term. Thus securing a new SEO client based on direct results in Google. Time investment on my part? 5 mins niche research using my GoldDigger Niche Research tool and 30 mins SEO promotion. I have done this many many times. I usually conduct these over the telephone and love the sound of their voice when I say, now enter x y z in google. They just love it. Seeing their sites ranking for a new term.

You are proving 2 things.

1. You know what their sites should be ranking for.
2. You can get the results in google for the niches you are suggesting for them.

Its not hard to get quality SEO Clients, when your competitors in this market are average at best. Most are pushing CPC as SEO LOL. So for a client to see results up front, normally seals the deal.

ALWAYS come to an agreement where you get paid monthly for your SEO services. Its not hard to find 100 related keyword phrases related to any business and do a couple of new ones from this list each month, providing stats in google of work done and each monthly report shows the client the new phrases you are targeting each month.

If you are new to providing SEO Services to clients, typically I say to my members, start off with a lower amount for your first couple of clients.

1. To gain experience.
2. To gain testimonials for your service.
3. To build confidence in your own ability.
4. Increase your monthly rate with each new client.
5. At the end of your first contracts, up your monthly rate to suit your new SEO service rate that you are currently charging. You'll be amazed at how your original clients do not blink an eye at your contract!. Why? Youve made them a lot of money in the process and any business worth their salt will want to hang on to this advantage.

Strategies learned above are already being used by my www.BruteForceSEO.com members who are enjoying the benefits of them in real time right now.

After completing your trial of this software and becoming a full member, you will be emailed the

Brute Force Social Bookmarking Submission software to use at no added cost to you :).

To get even more exposure, rankings and traffic from google, I am going to do you a special deal !!

I will email you a one time offer, where you get to enjoy the benefits of the full Brute Force SEO suit of modules in one Software application.

Featuring:

1. **Brute Force Linking Loophole module**. Submitting your money site URL's to 40 High Page rank Authority websites.
2. **Social Bookmarking Submission Module**. Submitting your money site Url's to the top 20 SB sites.
3. **Badass RSS submission Module**. Submitting your RSS feeds to the top 40 RSS Aggregators.
4. **Article Blaster Module**, submitting your articles to the top 20 Article Directories
5. **Brute Force Twitter Software**, which ive personally used to gain over 70,000 followers :)
6. **The Brute Force Web 2 site/blog creation** on each run of BF Including Hubpages hubs.
7. Access to our **Video Submission Module** using the Heyspread directory submitting your video URL's including your money site URL to the top 20 Video Directories.
8. Access to my **Gold Digger Niche research tool**, displaying related terms based on your original niche, showing you Keyword Search Volume from Google tool and competition in Google search and competition in “quotes” in google search, instantly revealing easy niches to target.
9. **Full membership access to my SEO Fight Club Forum** where you learn all the specific strategies to get truly amazing listings and backlinks, where I share my secret to long term traffic building strategies in google.com

Here's the deal. If you click on the link I provide you via email and take this offer to join my Brute Force SEO membership I will return you, your first membership payment for the Brute Force Linking Loophole membership. Simply put, Join BF via the special link provided. Then contact us via the support desk with your Paypal transaction Id's confirming such and we will return your original linking loophole membership payment.

Q. Will the affiliate who referred me miss out on their commission if I do this?

A. No, in fact they will enjoy the benefit of gaining another commission from your new BF membership.

Do not worry, my affiliate system on this product is tied in with my Brute Force SEO membership aswell. Meaning. Your paypal email address is associated with the affiliate who referred you for ever.

I designed my affiliate program to be this flexible. For example. If you promote this website using my Instant Paypal Affiliate Script www.bruteforcelinkingloophole.com/affiliates/ (note they only true instant papal affiliate script currently available)

And your referral takes up the upgrade offer, You get these Brute Force SEO commissions each and every month aswell.

My Instant Paypal Affiliate script works like this. Once your referral takes the \$1 trial. They pay my

Paypal account \$1. My Paypal account, then instantly pays YOUR Paypal account your 33% commission instantly! So you get an email from papal and my server. I pay affiliates their commission on the \$1 trial, mainly for statistical purposes. You are emailed from my server for every action your referral does from this point forward. Emails you when they become a full member and pay the monthly payment and emails you if they cancel.

I make a point of explaining how this system works, as the majority of my customers come from affiliates who just love this instant payment system that we developed.

LOL check out these rankings in Google.com

Paypal Affiliate
Paypal Affiliates
Paypal Affiliate Program

I achieved these rankings using www.bruteforcelinkingloophole.com software

Case Study 1.

Brief: As a 4wd enthusiast, I frequent a couple of 4x4 forums. I was reading one thread, where a person was asking about a Camper Trailer Company, if anyone had an experience with them, since he was considering purchasing a franchise off them. This company specialises in hiring out camper trailers.

He eventually declined their offer, he believed their asking price for a franchise was too high and their terms to limiting in scope for growth.

So being me, I thought I'd check out the search volume and competition in google.com just out of interest.

I went to <http://www.peterdrew.net/freekeywordsearchtool/> then clicked on the Google Keywords Tool link on the left. (there are tons of free keyword research tools there)

This is what I entered.

Results are tailored to the languages and countries you choose below:

| | |
|-----------------------|-------------------------------|
| English | All Countries and Territories |
| Chinese (simplified) | ----- |
| Chinese (traditional) | United Kingdom |
| Danish | Australia |
| Dutch | Austria |
| Finnish | Belgium |

| | |
|--|---|
| How would you like to generate keyword ideas? | Enter one keyword or phrase per line: |
| <input checked="" type="radio"/> Descriptive words or phrases (e.g. green tea) | camper trailer |
| <input type="radio"/> Website content (e.g. www.example.co.uk/product?id=74893) | <input checked="" type="checkbox"/> Use synonyms |
| | Type the characters you see in the pic |
| |  |
| | <input type="text" value="tmpasv"/> |
| | Letters are not case-sensitive |
| | Filter my results |
| | <input type="button" value="Get keyword ideas"/> |

Obviously this business is only interested in Australian traffic, so I chose Australia as seen in the image and started off using the term camper trailer to see what's going on.

This is the results

| Keywords | Advertiser Competition [?] | Local Search Volume: May [?] | Global Monthly Search Volume [?] |
|---|-------------------------------------|---------------------------------------|---|
| Keywords related to term(s) entered - sorted by relevance [?] | | | |
| camper trailers | | 135,000 | 135,000 |
| camper trailer | | 368,000 | 368,000 |
| trailer campers | | 880 | 14,800 |
| camper trailer used | | 1,600 | 4,400 |
| jayco camper trailer | | 8,100 | 5,400 |
| camper trailer australia | | 1,600 | 1,600 |
| campers trailers | | 1,300 | 9,900 |
| camper trailer rental | | 170 | 1,600 |
| camper trailer manufacturer | | Not enough data | 170 |
| camper trailer sales | | 880 | 1,900 |
| camper trailers for sale | | 9,900 | 8,100 |
| camper trailer parts | | 1,300 | 3,600 |
| camper trailer prices | | 140 | 210 |
| camper trailer hire | | 12,100 | 9,900 |
| camper trailer camping | | Not enough data | 1,300 |
| camper trailers used | | 3,600 | 8,100 |
| camper trailer tent | | 8,100 | 8,100 |
| coleman camper trailer | | 140 | 590 |
| camper trailer rentals | | 73 | 1,900 |
| camper trailer sale | | Not enough data | 3,600 |
| for sale camper trailer | | 3,600 | 3,600 |

see camper trailer hire last month had a search volume in Australia of 12,100 and an average of 9,900 every month.

Competition in Google.com.au for my term camper trailer hire is

See, im in heaven :) under a million competing pages, no top level domains listed up top. e.g no heavy hitters like wikipedia, yahoo answers, news sites, auction sites, only sites made by companies who are going for this term, too easy. Plus there is a LOT of Google Ads for this term, Which means there is money in this niche.

Now I see there's very little competition for this term in general, this inspires me to dig a bit deeper firstly putting my term in quotes in google like this.

Using the allintitle: tag in the search bar, this reveals how many other sites or more specifically pages in the google.com.au index have my term camper trailer hire in the title of these pages, and I can now see there are only 1,430 of these pages, who are the strongest competition.

This took me less than 3 mins to get this information. I used my Gold digger Niche research tool that I created for my Brute Force SEO membership. Though I showed you how you can replicate this using only free tools as above.

So what does all this mean?

1. I've found a good paying Niche.
2. This niche has traffic of 9,900 on average per month. Which is great for this type of business. This means I can drive a lot of free natural search engine traffic to this website by attaining a top level or No1 position for this main term and many other related terms.
3. This is a BUYING niche. People who are searching for this term are looking to spend money. No freebie hunters etc. People actually looking to hire a camper trailer.
4. There is very little competition in this niche.
5. I have a customer , the person on the forum who wants to get into this business though not pay the high entry fee close to 6 figures for a small franchise etc. I have contacted this person and organise a deal in one of many ways. (a) charge him per lead. (b) take a percentage of his business. e.g JV with him. (c) charge him a monthly fee for the website. (d) Sell the site to him outright. (e) If he doesn't come to the party with a satisfactory arrangement I'll put on a telemarketer to phone all the competition on a commission basis to sell the site to this market, once its reached No1 ranking in Google. (f) capture and sell leads to one of the companies in this market.

I opened my domain registrar and searched to see if cheapcampertrailerhire.com.au is available and it was. I put the word cheap on the front of the term as this will look great in the listings and encourage people to click on the link in google to my site. The content of the site is what will sell them on the product or not.

So I then downloaded wordpress and put a very simple wordpress blog on this domain, because google just loves wordpress blogs.

This is what it looks like. (this is purely as a test to get basic content on the domain so I can promote it using this software.

Camper Trailer Hire is proudly powered by [WordPress](#)
[Entries \(RSS\)](#) and [Comments \(RSS\)](#).

See I have a lead capture form on this page. I used this free one, so you can duplicate this blog exactly. <http://wordpress.org/extend/plugins/autoresponder-gwa/>

This is a fantastic free Wordpress Plugin. You can setup an auto responder series, import and export leads, send emails to your leads. Its like a mini Aweber.com system for your blog. Great for Capturing leads

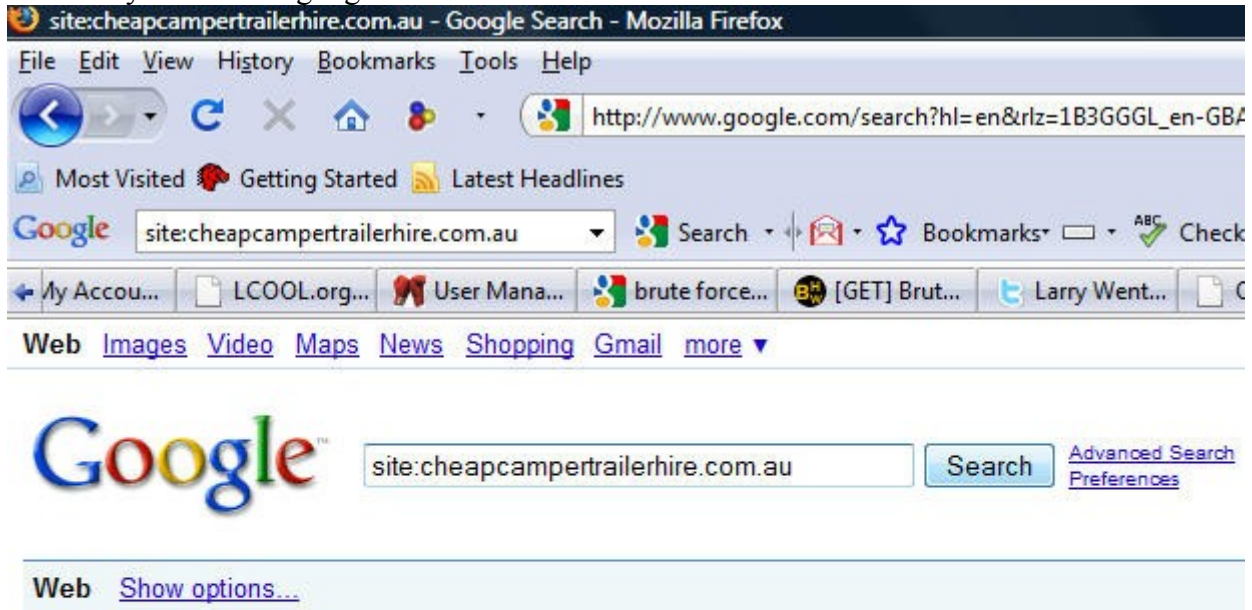

This is what I did exactly to this site, so you can duplicate what I have done here, using the same software to promote it and get the same results.

1. Put my term as the Title of the site = Camper Trailer Hire, I added this to the sub heading also as you can see.
2. I created a category called Camper Trailer Hire, and put the category widget in the right side bar.
3. I edited the default welcome wordpress message and added my niche in it, plus using the popular related camper trailer terms found in the free google keyword research tool as shown above, I used these terms as tags.
4. I then added the Tag Cloud widget to the right side bar.

All up to install this wordpress blog and make these changes took around 45 mins to complete.

This is all I need content wise to now start promoting this new domain in google.com.au and start to see some results in google.

See here my new site in google

Your search - **site:cheapcampertrailerhire.com.au** - did not match any documents.

Suggestions:

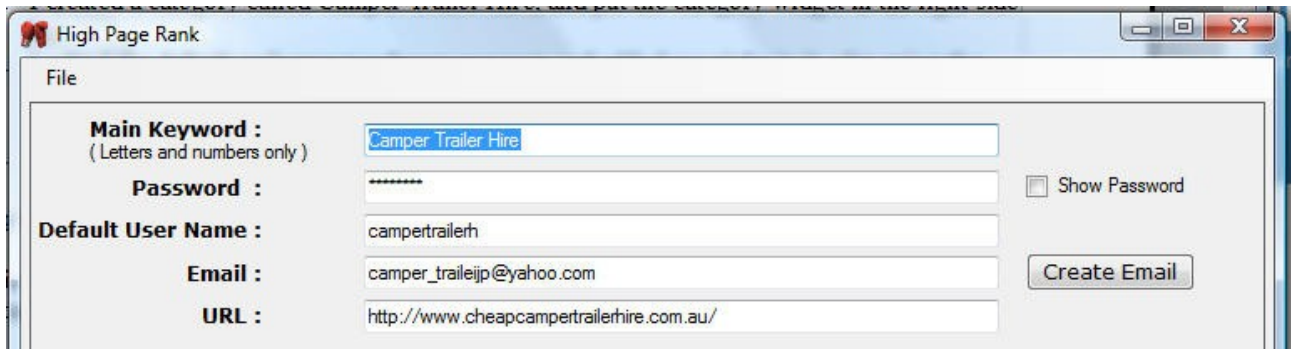

- Make sure all words are spelled correctly.
- Try different keywords.
- Try more general keywords.

As you can see this site is not indexed at all. Its a brand new domain.

Now you have the history about this project and exactly how I researched and created the site.

Right now I will start the Brute Force Linking Loophole software using Camper Trailer Hire

I created a yahoo email address using the software for all the high page rank site accounts to be listed.

Ran the software, created 40 links with anchor text of Camper Trailer Hire on all these sites.
Time taken = 30 mins.

That's it. I will repeat this process again in 1 or 2 weeks time.

You can see the results here live for yourself of this test that has taken me around 90 mins to achieve from the idea to the fully promoted website that's ready for sale.

A note about Local Listings.

Local listings, or more specifically targeting niches in local search engines. Like

Google.com.au

Yahoo.com.au

ninemsn.com.au

(note this above site will rank very well in all these sites above and get a ton of traffic from each. Notign the average search volume of 9,900 is from google.com.au only.)

Here,s the thing most people do not get, and I'd like to share with you know, because its incredibly important. Backlinks from sites other than google.com.au COUNT!! e.g. links from the sites in the software I am providing work just the same for .com.au domains that are listed in google.com.au as they do for any other domain in google.com itself.

Here's the beauty of it. We have the advantage of the power of these global domains providing us very nice linking love, pointing to sites in a local search engine but without the competition associated in Google.com

Plus, the google.com.au search engine does NOT list a lot of the more powerful domains that are in google.com meaning, the niches in the local engines like

google.com.au

google.fr

google.co.uk

google.il

google.gr

etc etc etc the list goes on.

These links work across different language search engines aswell. If you are living in a NON English speaking country, you can still put your non English niche as anchor text in this software and trust me on this, you WILL get amazing Rankings and Traffic in your local google engine. The same or better as in Google.com itself.

If local listings is not part of your internet business I strongly encourage you to start targeting these local niches.

Update. 3 hours ago I ran the Brute Force Linking Loophole software on the site above. I thought I'd check to see if the site is in google yet. Guess what? 3 hours later and I see this.

Pretty impressive If I don't mind saying so myself. :-)

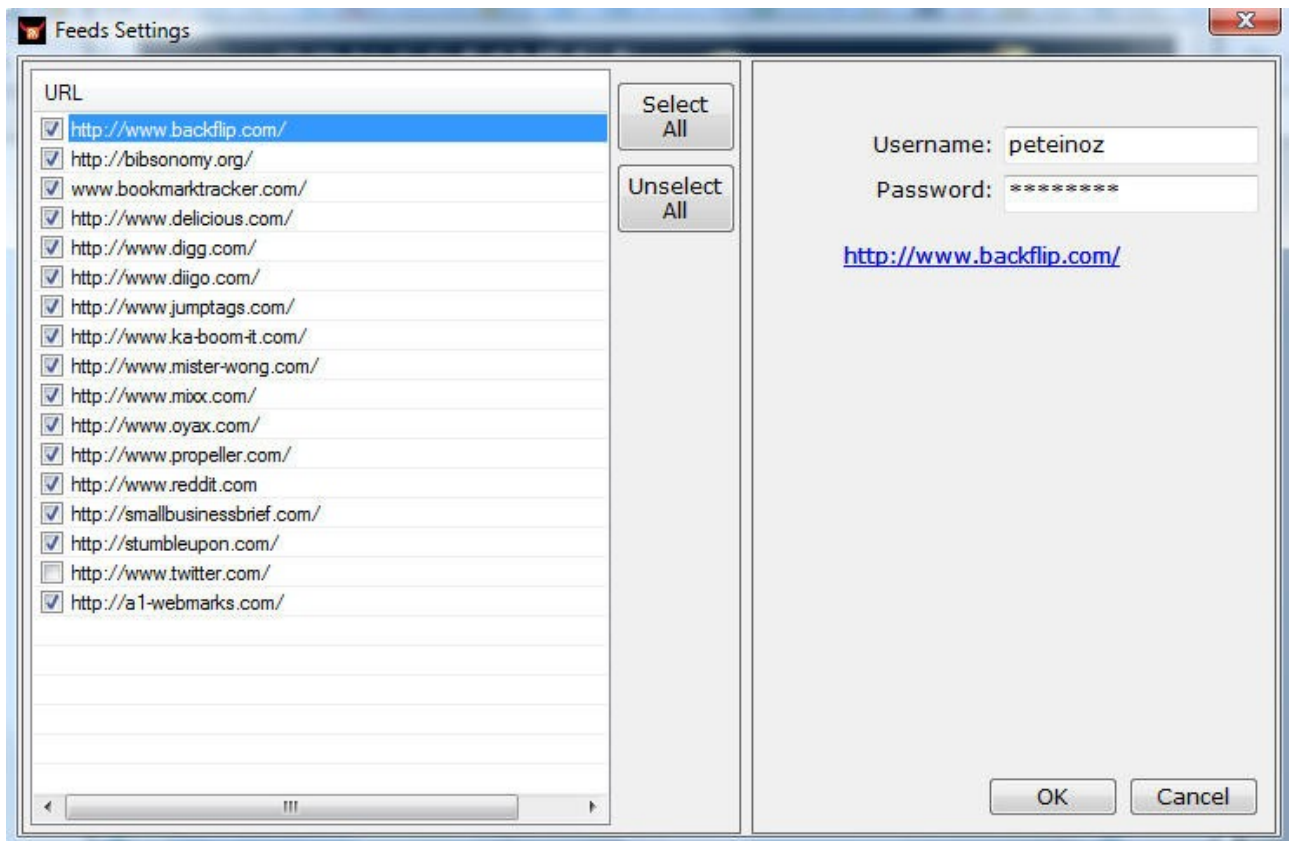

I just checked and this site entered the google index at 134, after only 3 hours after running it through the software.

At the end of this document you will see how we beef up these Account URL's very easily providing some nice 2 Way and 3 Way links to these High Pagerank Site account URL's That is just too easy, free and makes a massive difference to indexing and rankings! :-)

After testing the software, and staying on as a member you will also receive the download link for my Brute Force Social Bookmarking Submission Software.

First thing you need to do is click on the settings button.

You need to register for a free account at each of these Social Bookmarking Submission Sites.

Please record all the Account URL's and available RSS feeds for these sites to a text file.

Click on Each domain listed on the left to bring up a new window to enter your account info. If you are an existing Brute Force SEO member or past, the software will retrieve this information that was entered already.

Then in the main window, simply enter your info as shown below

Title: Main Niche keyword phrase you are targetting

URL: The URL of the site or page you are promoting.

TAGS: Your related keyword phrases pertaining to your main top level keyword phrase.

Category: Select from the pull down menu the related category.

Description: One sentence about the site you are promoting.

Click on Export to save these details to your hard drive for future reference. Import to retrieve them.

Once you have entered the data above.. you are all done!

Click on the

and you are all done.

But wait!!! There's more :-)

So using the above two software solutions to provide you with an incredible amount of link love for google. We can now take this to the next stage.

Once the Linking Loophole completes the project It pops up a window containing all your Account URL's

How would you like all these URL's displayed and listed on the top RSS Aggregators on the Internet, providing these links with a tons of link love and spider activity almost instantly?

This is how.

I just added this very cool feature to my

<http://www.html2rss.com> please go and register there now. This is a free site. (Use your best email address so you are alerted to new features we add to this site, and do not miss any.)

A bit about this site, I am providing this service where you can create RSS feeds from any static page websites you may own, and then promote the RSS feeds created via the RSS Aggregators to gain a LOT of link love very easily.

See the link circled in red below!

This site now allows you, to

Drum roll please!!

Convert a whole Bunch of URL's and mashes them into one RSS Feed!

This is the page where you enter your URL's

Create RSS Feed from list of URLs
This tool will help you to create an RSS Feeds base on multiple urls....

Title of your new Feed
(Required) :

Enter URLs :

Enter your info like this.

Create RSS Feed from list of URLs
This tool will help you to create an RSS Feeds base on multiple urls....

Title of your new Feed (Required):

Enter URLs:

```
http://www.museumofhoaxes.com/hoax/forums/member/10085/  
http://www.grist.org/member/134012  
http://rhizome.org/profile.php?1062800  
http://www.dailykos.com/user/seosofthere  
http://www.openleft.com//userDiary.do?personId=10523  
http://www.pamshouseblend.com/userDiary.do?personId=8102  
http://www.pkarchive.org/  
http://www.codeplex.com/  
http://www.acrobatusers.com/users/seosofthere  
http://virb.com/seosofthere/  
http://sphinn.com/user/view/profile/seosofthere
```

Update: We now break these url's into groups of two, any larger and this site becomes unreliable in creating a feed with too many links in it. Breaking it into two lots is perfect.

Then click on the Create RSS Now! Button and the site creates one RSS feed using your Niche entered in the Title field as the anchor text of each of the URL's in the RSS feed.

You can then promote this RSS feed to all the RSS Aggregators There are a few different ways to do this.

1. go to <http://www.peterdrew.net/socialsiteregistrations/> scroll down the left frame to see the RSS Aggregators list.
2. Go to www.badassrss.com See the video there, where you can use this software to automate the process of submitting RSS feeds to the top 20 Rss aggregators (take the trial for \$1)
3. Become a www.BruteForceSEO.com member which obviously has the RSS module, this linking loophole module. The Twitter Module (I use this and have over 80k followers) The article module, the video module, the web2 directory web creation module and much more.

Remember previously you recorded the Account URL's for the Social Bookmarking Submission sites? Well now you can add these to the html2rss.com site to create a feed for all these accounts aswell. Then promote this new RSS feed via on of the 3 options listed above.

Also you recorded the RSS feeds from the Social Bookmarking Accounts you just created. Use one of the 3 methods listed above to promote these RSS feeds via the RSS Aggregators.

Phew! Lots of info huh!

Let me explain the how's and why's we do this. It will make sense I promise you!

A brief lesson about RSS Aggregators. Firstly I have to say I LOVE rss aggregators and have been telling many 1000's and 1000's of people about them for years.

Simply put an RSS feed is a unified way of presenting information between websites. There are a couple of variation of formats of RSS feeds, but basically they all use a similar format. So websites or blogs that have an RSS feed. Gives people or other websites the ability to read this information in an RSS reader.

The beauty of RSS feeds is that they are live. For example on a blog, each time you create a new post on a blog. This post is automatically added to this blogs RSS feed. Meaning the RSS feed changes as the blog changes.

Here's what they do. They give you the ability to submit your RSS feeds to the RSS Aggregator. This Aggregator then presents the Contents of this RSS Feed, on their website. Now here's the good bit. "Including" the content of this rss feed, and the links Inside your RSS feed are displayed, or hosted on this RSS Aggregator Site!

So, if you create a post on your blog which has had its rss feed promoted to the rss aggregators, and this post includes a link inside this post. Then guess what? The rss aggregators update these feeds revealing YOUR link on THEIR websites. Starting to get the idea now? How simple the use of RSS Aggregators is to gaining backlinks automatically all over the internet? Its truly a beautiful thing, if your into SEO like I am!

Here's where it gets fun :)

So by now you have added the RSS feeds of your Social Bookmarking accounts to all the RSS Aggregators.

Each time you use this software, and submit more links to these social accounts. Guess what? You have not only sent your Money Site links to the Social Bookmarking Sites. But ALSO to the RSS Aggregator sites, almost instantly, providing your money site with MANY links from Web 2 Authority Sites in next to no time at all..

This in combination with your promotions using The www.BruteForceLinkingLoophole.com software will provide your money site with incredibly powerful links as far as google is concerned and you too will get the same results as I do, seen listed on the sales page above.

As mentioned in my video on the sales page and seen here
http://www.youtube.com/watch?v=-rZ_KxaBuVE

You are not only helping your domain rank well for the specific term you are targetting, but adding a lot of authority to it, in the eyes of google, thus making it even easier to get this domain to rank highly for other terms you target in the future, meaning each time you run both these software over your domain, it gets that bit easier to achieve the front page rankings you are after.

The true significance of these methods is not fully realised in google for 2 to 3 months, where the full potential of this work completed will be seen, when ranking for many other related terms to those that you are specifically targeting. These will be reveal in your Awstats in Cpanel, or whatever keyword statistics method you use. This does not mean you will not rank highly for your chosen niche in the short term, You will. But down the track a bit you will also see lots more traffic arrive from related terms to that of your originally targeted terms.

Google Dance, explained in simple Pete Terms.

Firstly, make sure your title reflects the same term you are targeting with the software, preferably with the target term at the beginning of the title tag.

Run both the software applications over this site
then go to google.com / advanced search / Results Per Page = 100

Record to a spreadsheet or text file, your sites ranking, if found at all.
Now you need to check again each 8 hours or so, till it lists. Typically, google will give this site a high ranking for 24 hours only. This is so google can list current news pretty much instantly. This ranking while only lasting 24 hours or so, gives you an indicator to where it will list eventually. If google continues to find new links to this site, it will think that this is not just a current news event and start to list it in their main index.

So when your listing disappears do not worry, this is exactly normal.

Once your initial high listing disappears or drops a couple of pages, now is the time to run the software again, alerting google to more interest in this website. It will take about 1 week for it then to reappear and hold close to the original high listing. If your not happy with the placement of this listing and want it even higher, repeat once a week till its where you want it. This is a very basic example that I use, though differs according to different niches targeted.

This is my suggestion to using this software in terms of niches to target.

1 domain.

3 different niches.

- (I) long tailed keyword phrase related to your niche, not all that much competition.
- (II) mid strength niche, related to your main term.
- (III) Top level niche, the main 2 word phrase for the niche you are targeting.

Use exactly the advice of the paragraphs above with each of your 3 niches.

You'll be amazed as I am with the results in only a couple of weeks.

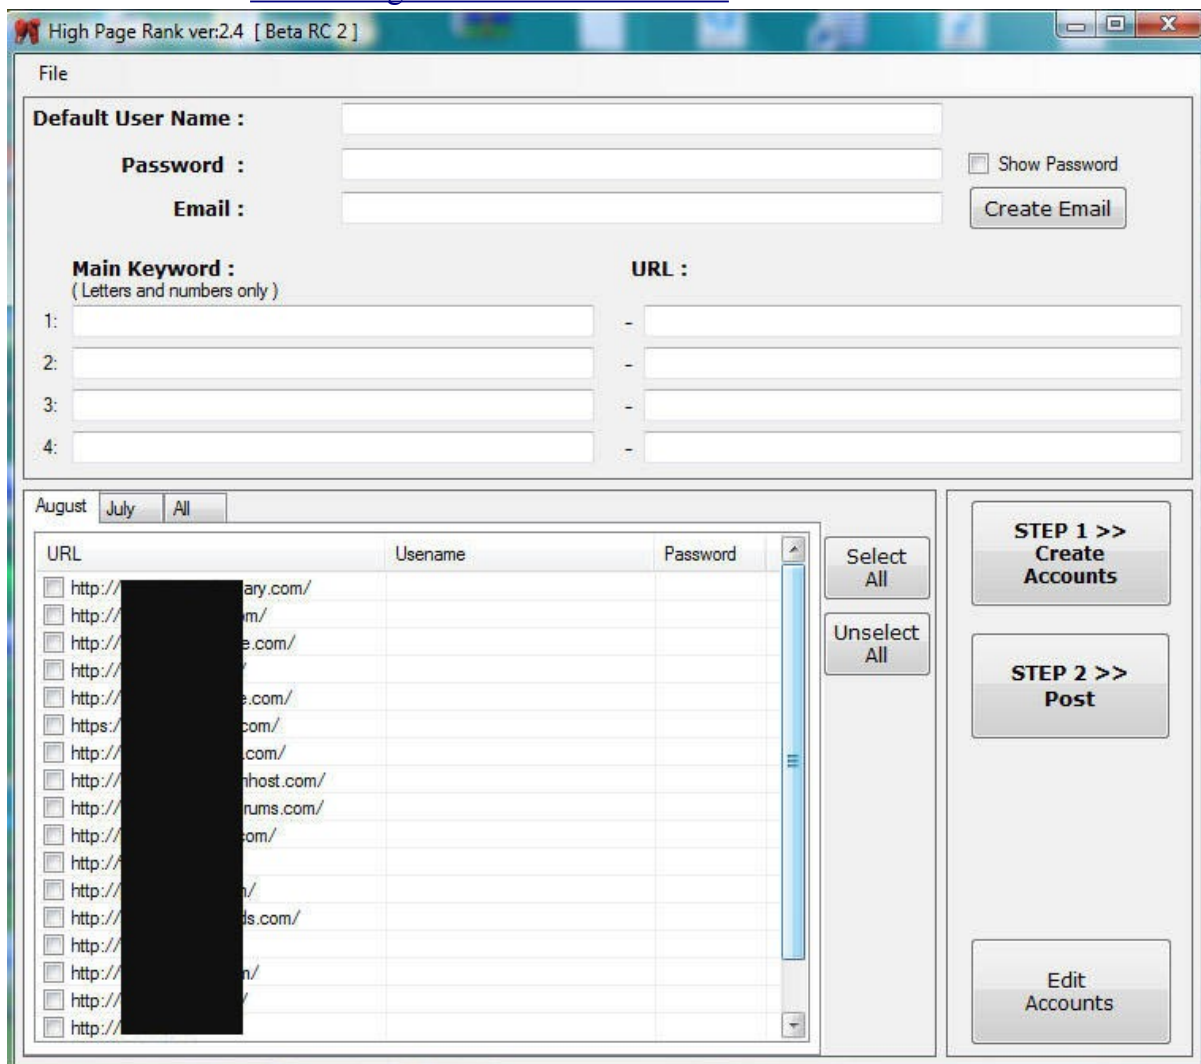

Major Update 21st August 2009

This Version as of 21 August 2009 is Ver 2.6 [beta RC 2]
(not 2.4 as shown in the image below)

This is the list of updates or changes we've made to this software.

1. Added ability for software to figure out the captures, so no capture entry required
2. Added ability to add up to 4 links and anchor text per one run of software.
3. Added use of real first and last names, we are now pulling from a list of 800 first names and 1250 last names, chosen randomly to create real looking names when creating accounts. Compared to the random text we were using in the past.
4. Added more sites for the month of August, we will add more each month (though this document will not be updated, a new tab will be added with the next months domains supplied.
5. Added ability to select an individual months worth of sites to promote to, or choose "All" months to promote too.

This is a major update and many thanks to those customers who made suggestions to improve the software in the forum www.seofightclub.bruteforceseo.com

Download it here www.bruteforcelinkingloophole.com/linkingloophole.zip

To install this software, please uninstall previous version by

Start / Settings / Control Panel / Add , Remove Programs

Uninstall the software via control panel first, then download from the above link and then install this version and your all ready to go.

A note about this kind of software, this software uses your Internet Explorer modules that are already installed on your computer. The software uses this module to communicate with the websites we are creating accounts on. If the software has an error on any of the new sites installed, what this means is, that your installed IE most likely requires a script installed to make this site run correctly on your computer, typically this is a flash update required or similar. If the software does error, note which site this happens on, then either

(a) uncheck it and pass it on the next run,

or

(b) go to this site in IE and create an account manually on it by hand, you will see that this page is presenting an error in IE, install the script needed for it to work correctly in your IE, then the software will work perfectly.

Also, its a good idea to delete cookies in your Internet Explorer at least once a week.

New Strategies using the updated software

Now with the ability to post for links per run, this gives us two different ways to use this feature.

1. 4 different URL's each with its own anchor text

or

2. 1 URL and 4 different anchor texts.

Using method 2. gives us the opportunity to do semantic linking to our money sites. This by FAR is my preferred method of using the new ability to use 4 fields in the software.

This is exactly how I utilises this new ability.

If my main keyword is

refinance house

I will then collect the next Best 6 related keyword phrases related to “refinance house” and save these to my project file.

My money site will have refinance house in the title, the links provided with semantically relevant keyword phrases will help the main keyword phrase I'm targeting rank well in google.com

Choosing your related keyword phrases.

Taken from <http://www.peterdrew.net/freekeywordsearchtool/> which lists the Free google keyword tool plus other free keyword research tools. (bookmark this site for future reference)

see the edit link below, click on that in the google keyword tool, to select the country you are marketing to if targeting local listings. e.g If I was making a home refinance site in Australia I would then choose Australia.

If its an international market, choose “All Countries and Territories”

Results are tailored to **English, United Kingdom** [Edit](#)

Once you have done this, then you are choosing the terms that get the most searches per month, related to your main term. Even if these appear to competitive a term to target, this is not a problem in the least, what we are achieving here is giving google semantically related anchor text links, with the main term being presented in your title.

While in the google keyword tool you will see there are two main categories of results.

1.

Keywords related to term(s) entered - sorted by relevance [?](#)

2.

Additional keywords to be considered - sorted by relevance [?](#)

Personally I get 3 from each. If there are a lot of high volume related keyword phrases, I will save these aswell.

For this example from

1. I have collected.

| Choose columns to be displayed: ? | | | | |
|--|---|---|--|---------------------------------------|
| Show/hide columns ? | | | | |
| Keywords | Advertiser Competition ? | Local Search Volume: July ? | Global Monthly Search Volume ? | Match Type: ? |
| Keywords related to term(s) entered - sorted by relevance ? | | | | |
| refinance house loan | <div style="width: 100%; height: 10px; background-color: #808080;"></div> | 4,400 | 1,900 | Add ↕ |
| refinance house mortgage | <div style="width: 100%; height: 10px; background-color: #808080;"></div> | 8,100 | 4,400 | Add ↕ |
| refinance the house | <div style="width: 100%; height: 10px; background-color: #808080;"></div> | 720 | 720 | Add ↕ |
| refinance a house | <div style="width: 100%; height: 10px; background-color: #808080;"></div> | 2,400 | 2,400 | Add ↕ |
| refinance your house | <div style="width: 100%; height: 10px; background-color: #808080;"></div> | 1,900 | 1,600 | Add ↕ |
| refinance house | <div style="width: 100%; height: 10px; background-color: #808080;"></div> | 27,100 | 27,100 | Add ↕ |

From that list above these 3.
 refinance home loan
 refinance house mortgage
 refinance a house.

From:
 2.

| Additional keywords to be considered - sorted by relevance ? | | | | |
|--|--------------------------|-----------|------------|---------------------|
| refinance | <input type="checkbox"/> | 9,140,000 | 13,600,000 | Add |
| refinance home | <input type="checkbox"/> | 550,000 | 673,000 | Add |
| no closing cost refinance | <input type="checkbox"/> | 12,100 | 8,100 | Add |
| refinancing house | <input type="checkbox"/> | 12,100 | 9,900 | Add |
| house loan | <input type="checkbox"/> | 110,000 | 74,000 | Add |
| refinance mortgage | <input type="checkbox"/> | 4,090,000 | 3,350,000 | Add |
| cash out refinance | <input type="checkbox"/> | 22,200 | 18,100 | Add |
| should i refinance | <input type="checkbox"/> | 14,800 | 18,100 | Add |
| refinance your home | <input type="checkbox"/> | 9,900 | 9,900 | Add |
| bad credit refinance | <input type="checkbox"/> | 201,000 | 110,000 | Add |
| mortgage loan | <input type="checkbox"/> | 7,480,000 | 6,120,000 | Add |
| mortgage loans | <input type="checkbox"/> | 6,120,000 | 6,120,000 | Add |

no closing cost refinance
 bad credit finance
 mortgage loans

So my final list is

Main keyword phrase is
 refinance house

6 semantically related terms are
 refinance home loan
 refinance house mortgage
 refinance a house
 no closing cost refinance
 bad credit finance
 mortgage loans

It makes sense that the names linking into my money site with this related variation of link names on very powerful authority websites will tell google that my site has authority in this market and will rank it accordingly. And it Does Do Exactly That :-)

Above is exactly how I do it, when targeting tough niches.

In the first promotion of my refinance house site I will enter my data in the fields exactly like this.

| Main Keyword : (Letters and numbers only) | | URL : |
|---|---|--|
| 1: | <input type="text" value="refinance house"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |
| 2: | <input type="text" value="refinance home loan"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |
| 3: | <input type="text" value="refinance house mortgage"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |
| 4: | <input type="text" value="refinance a house"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |

Then in 4 to 7 days I will then do another promotion using these terms

| Main Keyword : (Letters and numbers only) | | URL : |
|---|--|--|
| 1: | <input type="text" value="refinance house"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |
| 2: | <input type="text" value="no closing cost refinance"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |
| 3: | <input type="text" value="bad credit finance"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |
| 4: | <input type="text" value="mortgage loans"/> | - <input type="text" value="http://www.petesrefinancesite.com"/> |

Noting in No 1 I have the main keyword phrase each time.

If there are a large amount of high traffic related keyword phrases in the next 4 to 7 days I will then use another 3 related keyword phrases, though still with the main phrase in No1 position.

The above strategy works very well, and you can achieve excellent rankings using this method.

Some people will use the software to promote 4 different sites at one time, and this will work, though the above mentioned strategy will be much more powerful. If you are targetting low hanging fruit niches in google, 4 different sites at once is very satisfactory, though personally I use the above method each and every time I promote a new or existing website.

You'll be happy to know, that when I first created this software, I thought I'd test a very competitive market to really test this software's ability to rank for very tough terms. e.g
marketing software
120,000,000 competing pages in google

Web [+ Show options...](#) Results 1 - 10 of about 120,000,000 for [marketing software](#).

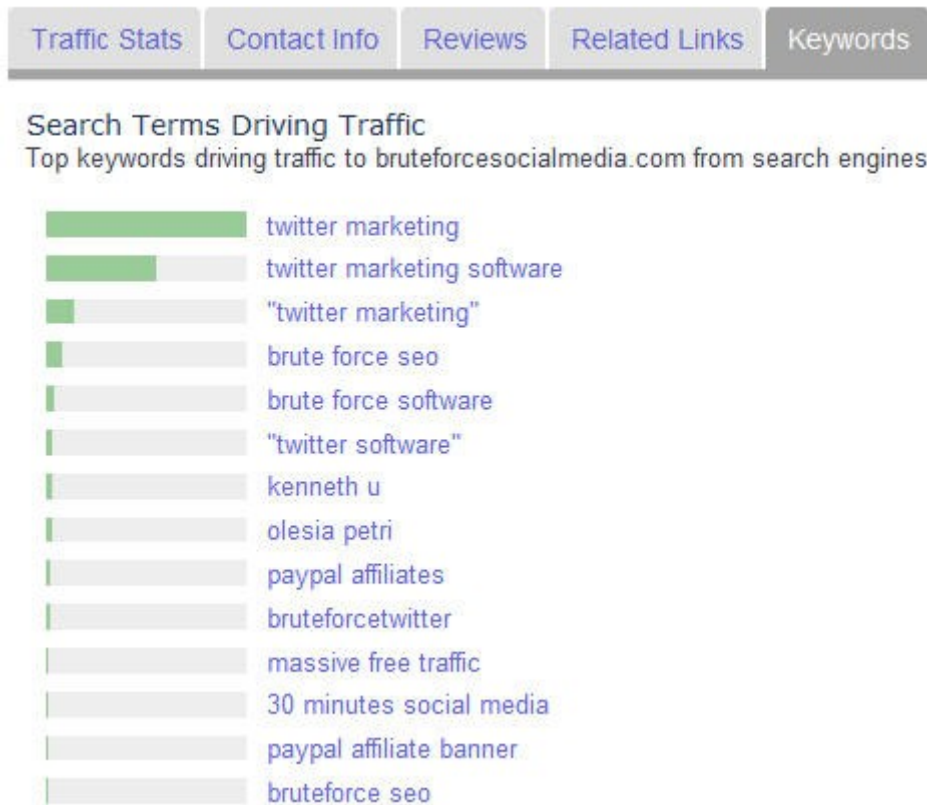

and a search volume of

| Keywords | Advertiser Competition ? | Local Search Volume: July ? | Global Monthly Search Volume (|
|--|---|-----------------------------|--------------------------------|
| Keywords related to term(s) entered - sorted by relevance ? | | | |
| marketing software |  | 22,200 | 165,000 |

When I started this experiment, my site bruteforcesocialmedia.com was not in the top 1000 in google. I completed the steps listed at the top of this document, e.g. changing title to suit and running my linking loophole software over it.

Once the title updated with this term in it, this site entered the index for this term at 155. hmm.. wasn't too happy about that LOL, but I continued plugging away using the software and now very happy to say that this site is now ranking between 5 and 7 on the front page. And is very much enjoying the traffic derived from this listing thank you very much!! :)

Note my keywords being used to find this site in alexa.com

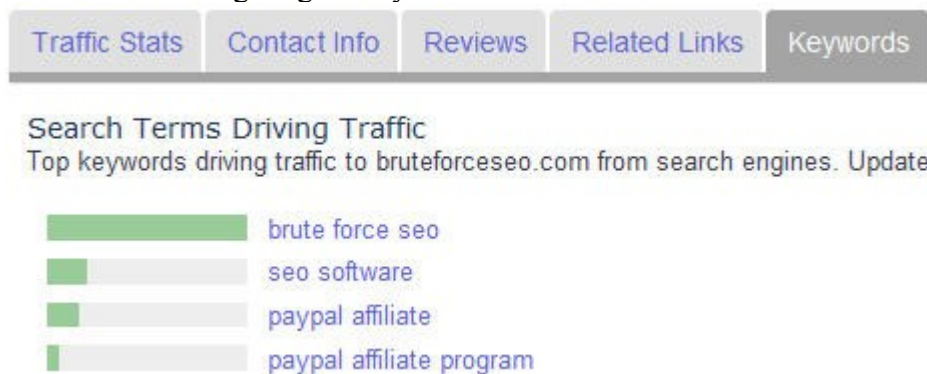

<http://www.alex.com/siteinfo/bruteforcesocialmedia.com>

My marketing software rankings have only appeared in the last couple of days, so these are not reflected in these results in the above image, though give it a couple of weeks and they will be. Also note, these are the terms I've been targetting using the linking loophole software as noted at the top of this document. So this is very nice proof that the software does exactly what it says it does. Effectively, I'm entering keyword phrases in my linking loophole software, the site is ranking for these exact terms and alexa then displays these exact keyword phrases from the data they collect

from internet users, it doesn't get much cooler than that in my opinion :)

Similarly for the terms I was targeting for my main site bruteforceseo.com

<http://www.alexacom/siteinfo/bruteforceseo.com>

being:

- seo software
- paypal affiliate
- paypal affiliate program

It blows me away to see the keyword phrases I entered in my linking loophole software end up on a third party site that collects data from internet surfers. Its truly proving a full circle in my marketing efforts.

Btw, this is another great place to find excellent semantically related keyword phrases to use in your website promotion. Hmm... but which site do I enter to get this data I hear you say? One of your competitors who are already ranking for the terms you are targeting :-)

The link would be <http://www.alexacom/siteinfo/YourCompetitorsURL.com>

If you are an existing Linking Loophole member and reading this information as an update. Go to Alexa.com now with your money site url at the end and click on the keywords link, you might get a very nice surprise :)

At this stage, I'd just like to share one post from my forum with you.

Here's a good story everyone may enjoy.

I was the vice president of a small company for 10 years. I built the company for the owner who is 40 years older than me. I walked in one day and he gave my job to his son-in-law.

Now what? On the weekend a six figure salary, on Monday unemployed.

Here's what you do. You do exactly what you know how to do. Build a company to compete against the old one.

Enter [Linking Loophole](#).

I was 42 out of 90,000 pages in Google for my old company's product name. They were obviously number one. This is a keyword the niche regularly searches.

I ran Linking Loophole twice during the first week. Patience isn't a virtue of mine. Then, I waited. I bounced up, and then back down, just as Peter said would happen.

Now it is approximately three weeks later and I am NUMBER 2!

I've noticed a considerable increase in traffic and more sales BUT, and this is a big BUT, the best part is that...

THEY have no idea how in the hell I am there and I know it is wreaking havoc in their office!

Thanks, Peter.

Btw, keep an eye out for my new Brute Force Seo **EVOLUTION II**

This is a totally new www.BruteForceSEO.com software that is now Wizard style, so incredibly simple to use and pretty much "Auto Everything" It just doesn't get any better than this in the SEO Automation world, and this obviously includes all my other software products and modules including twitter and linking loophole software, my rss and article submission tools Web 2 property site generators, and is very smart seo wise so you do not have to be.

Ok guys, sorry for the novel :) but hope you enjoyed it as much as I have sharing this valuable info with everyone!

For any queries about strategy, start a new thread in the forum www.seofightclub.bruteforceseo.com
